Minsk, Belarus

PROFESSIONAL SUMMARY

I'm a Frontend Developer with 1.5+ years of experience specializing in application development using React.js, Next.js, TypeScript, JavaScript, Redux, Redux-toolkit, Tailwind, Vite. Familiar with unit testing using Jest/Vitest and React Testing Library. Have experience in selecting project architecture and technology stack, took a part in a team work of 3 developers. Adheres to best coding standards and code review practices, including SOLID, DRY, KISS, YAGNI, and design patterns.

EXPERIENCE

- September 2024 - October 2024

Frontend Developer

T1 Group / Belarus, Minsk

Professional education - Advanced training course in frontend development:

- browser operation, critical rendering path, optimization
- patterns, architecture, microservices
- state managers
- client-server interaction
- testing
- algorithms and data structures
- advanced react (fiber, ssr, ssg)

Developed SPA with authorisation, catalog of products, cart, detail information about product.

Technologies: TypeScript, React, Redux-toolkit, RTK-query, ESLint, Prettier, Vite.

- Deployment of the final product in github: <https://github.com/sk85web/goods4you/>
- Deploy of the final product on gh-pages: <https://sk85web.github.io/goods4you/>

- October 2023 - June 2024

Frontend Developer

TeachMeSkills / Belarus, Minsk

Professional education - Developed a book e-commerce website using TypeScript, React and Redux:

- Layout design in Figma (HTML & CSS).
- Implementation of user authentication system (Redux-saga)
- Creation of forms for seamless user interaction
- Dynamic search functionality with server requests
- Deployment of the final product in github: <https://github.com/sk85web/book-store>
- Deploy on Netlify: <https://sk85-book-store.netlify.app>

• September 2023 - May 2024

Frontend Developer

The Rolling Scopes School / Belarus, Minsk

Professional education - Developed multiple applications during coursework:

- Created several applications starting from vanilla JavaScript to Single Page Applications (SPA) using TypeScript, Webpack, modular programming, and fetch requests.
- Final project: an e-commerce application as part of a team using Tailwind CSS, TypeScript, React, Redux Toolkit, and Vite.

EDUCATION

• September 2003 - May 2008

Graduate

Belarusian National Technical University / Belarus, Minsk

• October 2023 - June 2024

Graduate

Programming school TeachMeSkills / Belarus, Minsk

• September 2023 - May 2024

Graduate

The Rolling Scopes School / Belarus, Minsk

LANGUAGES

- English
- Russian

TECHNOLOGY SUMMARY

Languages: JavaScript, TypeScript

Frameworks and Libraries: React.js, Redux, Redux Toolkit, Next.js

Development Tools: Jest, Vitest, ESLint, Prettier, Webpack, Git

Methodologies: SOLID, DRY, KISS, YAGNI, Design Patterns

Additional Skills: Tailwind, Vite, REST API, Figma, GitHub
